Handle With Air

The benefits of vacuum lifting

The variety of products and the handling possibilities are versatile.

It is possible to lift, flip, turn and translocate the load at desired height.

The advantages of vacuum handling technology are:

Fast and simple handling: sucking and releasing only needs a few seconds

Reduction of production costs:

higher production speeds, saves on hoisting equipment, less man power and low energy consumption

No damage on the load Safety first:

double safety factor:

very reliable safety provisions in case of power failure.

Handle With Air

Lootah Lemmens crane systems

AEROLIFT Industrials B.V. is specialised in using the vacuum principle for lifting. That offers innovative solutions for your handling problems. See for yourself how the AEROLIFT handles concrete elements, pipes, plates and other products.

▲ AEROLIFT type 60 ES
6t capacity

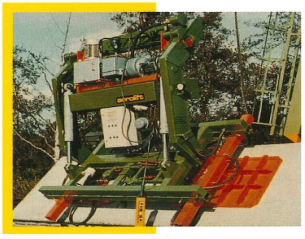

▼ Stationair turning device
8t capacity

▼ AEROLIFT type 80 E
8t capacity

▲ AERO-TURNLIFT
type T 100 E-90"
10t capacity

▲ AEROLIFT type 60 ES
6t capacity
